

CANCER REGISTRY OF GREATER CALIFORNIA

Summary of Service Fees

Case Listings for Studies

Fees are required for all case listings. The cost of the case listing depends on whether the study involves patient contact and whether cases will be obtained through regular reporting methods (for which cases are available 1-2 years after diagnosis) or via Early Case Ascertainment (for which cases are available several months after diagnosis).

- Case listings obtained through regular reporting methods
 - Initial case listings
 - Non-patient contact studies: \$2,000 for up to 2,000 cases, and \$1 per additional case
 - Patient contact studies: \$6,000 for up to 2,000 cases, and \$3 per additional case
 - Subsequent case listings are \$500 each.
 - Any modification to the initial case selection criteria incurs a fee and varies depending on the magnitude of the change.
- Case listings obtained through Early Case Ascertainment
 - The cost depends on case eligibility criteria. Please contact the CRGC Data Release Coordinator for additional information and to obtain a quote: research@crgc-cancer.org.

Other Services and Activities

CRGC research staff offers other services, including study consultation, data analysis, and programming support. Costs for such activities require an initial \$375 (\$250 for project set up + \$125 for the first hour of work) and \$125/hour thereafter. Contact the research staff for more information: research@crgc-cancer.org.
