# 4.6 Rehabilitation Care Services

## **Definition and Requirements**

Policies and procedures are in place to guide referral to appropriate rehabilitation care services on-site or by referral. Rehabilitation care is patient-centered care that optimizes patient functional status and quality of life through preventive, restorative, supportive, and palliative interventions. The availability of rehabilitation care services is an essential component of comprehensive cancer care, beginning at the time of diagnosis and being continuously available throughout treatment, surveillance, and, when applicable, through end of life.

Rehabilitation professionals associated with cancer rehabilitation typically include, but are not limited to:

- Physiatrists
- · Physical therapists
- Occupational therapists
- Speech language pathologists

Types of rehabilitative care services may include, but are not limited to:

- Screening, diagnosis, and management of physical dysfunction, impairments, and disabilities
- Interventions to manage identified functional impairments and disabilities
- Screening, diagnosis, and management of pain and nonpain symptoms
- Screening, diagnosis, and management of cognitive function
- · Lymphedema management
- Physical activity recommendations during and after treatment
- Vocational rehabilitation

The cancer program defines and identifies in a policy and procedure the rehabilitation care services provided on-site and by referral. Rehabilitation services not available at the facility must be provided through a referral relationship to other facilities and/or agencies. The cancer committee will define and identify in a policy and procedure the following:

- · On-site and off-site rehabilitation care services
- The rehabilitation care team available on-site
- · Criteria for performing functional assessments
- · Criteria for referral to a rehabilitation care specialist

### **Evaluating Rehabilitation Care Services**

Each calendar year, the cancer committee must monitor, evaluate, and make recommendations for improvements, as needed, to rehabilitation care services and/or referrals. The content of the review and any recommendations for improvement are documented in the cancer committee minutes.

If available, it is recommended that a rehabilitation professional attend the cancer committee meeting to lead the discussion and provide the report.

#### Documentation

#### Submitted with Pre-Review Questionnaire

- Policy and procedure defining rehabilitation services that are provided on-site and by referral
- Cancer committee minutes that document the required yearly evaluations of the rehabilitation care services

## Measure of Compliance

Each calendar year, the cancer program fulfills all of the compliance criteria:

- The cancer committee develops policies and procedures to guide referral to appropriate rehabilitation care services on-site or by referral.
- The process for referring or providing rehabilitation care services to cancer patients is monitored and reviewed by the cancer committee and documented in the cancer committee minutes.
